### **DETAILED ACTION**

This is the second office action for U.S. Application 10/754,871 for a Raisable Pedestal Containing Electronic Components filed by Andrew Vaccaro on January 9, 2004. Claims 11-23 are pending.

#### ***Allowable Subject Matter***

Claims 11-23 are allowed. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a raisable pedestal with an enclosed housing; a guide arrangement mounted within the housing; an inner support mounted for movement along the guide arrangement between a retracted position entirely within the housing and an extended position extending out from the housing, the inner support including an arrangement for supporting electronic components in a manner to render the electronic components accessible when the inner support extends out from the housing; a driving arrangement for moving the inner support along the guide arrangement between the retracted and extended positions; a precipitation sensor mounted on one of the housing and inner support, for detecting precipitation; and a control connected with the sense and said driving arrangement for controlling the driving arrangement to move the inner support to the retracted position when the sensor detects precipitation in order to protect the electronic components supported by the inner support from the precipitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
